For the complete management of a technical room

## Presentation

**M**y Ozonex is first and foremost a complete management device for your technical premises. It is equipped with a large 10-inch touch screen offering a general view of the pool and its equipment in operation in real time - the «synoptic view». With a simple click, the pool maintenance employee can access the equipment of his choice and control it easily. He can also consult the product consumption report (per day/week/month) and obtain a visual on the level of products present in the tanks. Filtration control is just as easy, offering the possibility of creating and managing different time slots according to the number of people in the pool.

## Analysis chamber

**T**he transparent PMMA measuring chambers are used for a better view of the water circulation. Adaptable in monobloc or modular version, these analysis chambers can receive from one to several probes, measurement sensors: water flow, pH, REDOX, temperature, amperometric (chlorine).

## Dosing pump

**O**zonex electromechanical dosing pumps are used to dose all types of liquid chemicals used for pH and chlorine management. The flow rate of the electromechanical dosing pumps is chosen according to the volume of water in each pool to be treated.

## The package includes

- ✓ Pre-mounted 800x800 wall bracket.
- ✓ 1 complete My Ozonex management device.
- ✓ 1 probe holder + pH/REDOX/temperature probes.
- ✓ 1 acid dosing pump + 1 chlorine dosing pump.  
(flow rate according to the volume to be treated)
- ✓ 1 pump connection kit + injection cannulas + crystal tube + bottom cannulas + 316L stainless steel injectors (for probe holder irrigation).
- ✓ 1 application kit for swimming pool owners + customers.  
(remote management of your customer base)

## Description and options

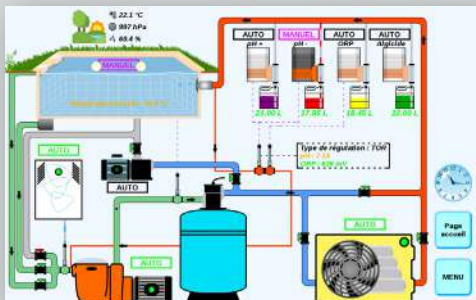

### Probes and sensors

- ✓ temperature of the water (PT 1000)
- ✓ pH
- ✓ REDOX
- ✓ filter pressure
- ✓ amperometric 1  
(automatic calculation of free/active chlorine)
- ✓ amperometric 2  
(automatic calculation of total/combined chlorine)
- ✓ temperature of the air
- ✓ hygrometry
- ✓ atmospheric pressure

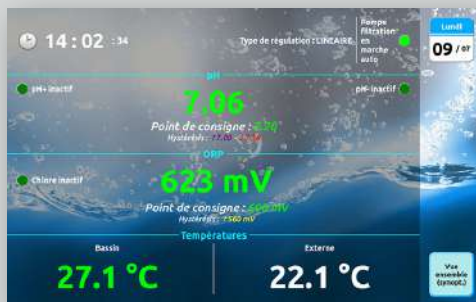

### Automatic device management

- ✓ filter pump (maximum 3)  
or 1 variable speed pump
- ✓ heating (heat pump, solar, exchanger...)
- ✓ pool lighting
- ✓ filter pressure (installation of a probe)
- ✓ management of a fountain (or slide)
- ✓ disinfectant (ozonator or UV lamp)
- ✓ booster (tank cleaning)
- ✓ sensors
- ✓ automatic regulators  
(pH-, pH+, REDOX, anti-algae)

### Quick access

synoptic

home

menu

### Automatic regulators

- ✓ pH-
- ✓ pH+
- ✓ REDOX
- ✓ anti-algae or timed flocculent

### The built-in parameters

- ✓ 10" touch screen with synoptic view  
(view showing the whole installation)
- ✓ programmable superchlorination
- ✓ frost-free (avoids wintering)
- ✓ product consumption (day/week/month)
- ✓ product level in the bins (low level alarm)
- ✓ event log
- ✓ time slots for automation (4 slots maximum)
- ✓ calibration of the various sensors
- ✓ clock
- ✓ application for pool professionals
- ✓ OZONEX remote monitoring  
(additional security for the pool owner)

- ✓ included
- ✓ optional (see tariff)

(degressive price according to volume, consult us)

# Ozonators

## FOR PUBLIC POOLS

what is ozone ?

**O**zone is the most powerful disinfectant. It oxidises bacteria, viruses and algae spores. Ozone is 10 times more oxidizing than chlorine.

It is produced by an ozonator placed in the pool's technical room.

We use the vacuum of the pump upstream (venturi effect) to draw air into this ozonator.

The air containing  $\pm 20\%$  oxygen will be subjected to an electrical discharge which will transform oxygen ( $O_2$ ) into ozone ( $O_3$ ).

The disinfection will take place in the piping and especially in the filter pump which, thanks to its turbine, will make a perfect water/ozone mixture (emulsion).

The ozone will destroy all organic matter, whatever the pH and temperature of the water.

The pressure downstream of the pump will immediately recombine the ozone into oxygen.

The water in the pool will be completely disinfected with oxygen.

No allergy possible, no aggression to the eyes, skin or hair, the bathing water becomes as pleasant as spring water.

Can be easily adapted to all filter systems, new or old.

Ozone protects our environment and respects the planet.

**T**hanks to the effect of ozone, you can guarantee your customers perfect bacteriological quality and unequalled bathing comfort.

# Ozonators

## FOR PUBLIC POOLS

**O**ur ozonators for public swimming pools are made to measure. In order to correctly answer your price request, we need several information concerning the pool to be treated

- the volume of the pool
- the number of filtration pumps
- the water flow rate of each filtration pump

EX200

Ozonator with 2 corona generators and 1 ozone outlet for 1 filter pump of 40 m<sup>3</sup>/hour.

EX200-SP

Ozonator with 2 corona generators and 2 ozone outputs for 2 filter pumps of 20 m<sup>3</sup>/hour each.

EX400-SP

Ozonator with 4 corona generators and 2 ozone outputs for 2 filter pumps of 40 m<sup>3</sup>/hour each.

### They include:

- ✓ 1 metal case
- ✓ 1 front side with identification :
  - power-on lights (green)
  - ozone production lights (blue)
  - on/off switch
  - electrical connection 220 Volts / 50 HZ
  - air flow meters
  - air coolers (ventilators)
- ✓ EHV electronic cards
- ✓ Mounting accessories :
  - 316L stainless steel check valves with viton seal and glass ball
  - PTFE ozone tubes
  - PVDF tubes for solenoid valves and fittings
  - air filters
- ✓ Ozone generators

Other devices are available, Ozonex adapts its manufacture according to the volume and flow of water in the pool concerned.

# Application

## An application becomes your pool assistant

**O**ur My Ozonex home automation system allows you to remotely manage all the functions concerning the pools in your customer base with your smartphone, tablet or computer and wherever you are.

The aim is to provide management comfort for you and your technicians.

Our home automation will also ensure a high quality and comfortable bathing experience for your customers.

On your screen and in the blink of an eye, you have all the possible information of your pools or spas live, so that you can easily determine the type of function and the options you want for each of your applications.

**N**o need to go to your technical premises, My Ozonex takes care of everything!

Check your entire pool of connected customers in the blink of an eye on your office computer and modify, refine and optimize each pool with a single click.

Home automation makes your daily work easier and becomes your pool assistant.

It relieves you of many tasks with little added value (chlorine shock, adjustment of the filter pump's time slots, etc.), which allows you to concentrate on the essential tasks.

Home automation boosts your additional sales, for example by offering the sale of consumable products when customers run out.

By offering My Ozonex to your customers, you can reassure them with a maintenance service that sets you apart.

Application available on Android and IOS

# Application

remote management of your customer base

In the event of a problem, My Ozonex will provide you with a complete and precise list of actions to be taken to remedy the situation (empty tank, daily injection time exceeded, blocked cannula, etc.).

You can easily optimise all your teams' movements if a remote solution is not sufficient. Saving time and efficiency will increase the profitability of your services and maintenance contracts. Guarantee your customers a personalised follow-up, innovative solutions adapted to their needs for their greatest comfort, and perfectly managed water all year round, even during their absence.

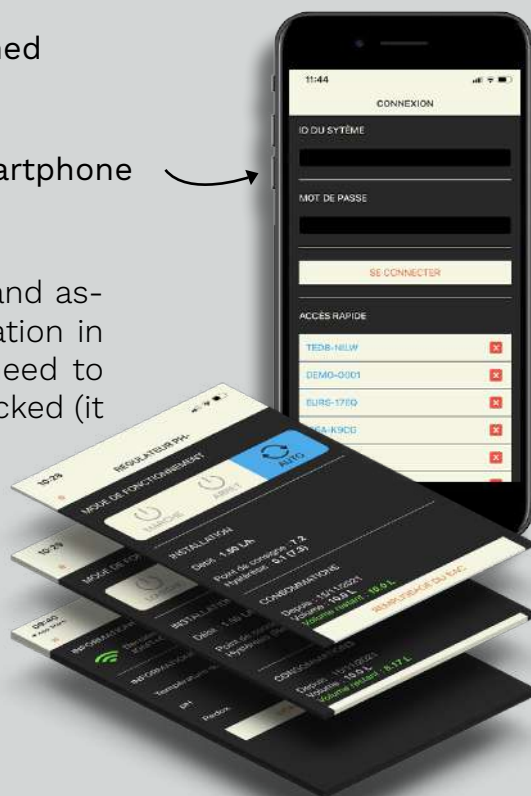

or with your smartphone

## Ozonex assistance

If necessary and at your request, Ozonex can advise and assist you remotely. You will only appear on our application in your own name (your company name), so you will need to provide us with the password for the device to be checked (it is your property).

My Ozonex "gestion PRO", innovation for you professionals.

## diagram of the injection principle

### ozone and regulation

**O**zone is the most powerful disinfectant. It oxidises bacteria, viruses and algae spores. Ozone is 10 times more oxidizing than chlorine.

It is produced by an ozonator placed in the pool's technical room.

We use the vacuum of the pump upstream (venturi effect) to draw air into this ozonator.

The air containing  $\pm 20\%$  oxygen will be subjected to an electrical discharge which will transform oxygen ( $O_2$ ) into ozone ( $O_3$ ).

The disinfection will take place in the piping and especially in the filter pump which, thanks to its turbine, will make a perfect water/ozone mixture (emulsion).

The ozone will destroy all organic matter, whatever the pH and temperature of the water.

The pressure downstream of the pump will immediately recombine the ozone into oxygen.

The water in the pool will be completely disinfected with oxygen.

No allergy possible, no aggression to the eyes, skin or hair, the bathing water becomes as pleasant as spring water.

Can be easily adapted to all filter systems, new or old.

Ozone protects our environment and respects the planet.

A modern architectural scene featuring a long, narrow swimming pool with a dark, textured tile floor. The pool is bordered by a light-colored concrete deck on the left and a white building with large windows on the right. In the background, there are lush green trees and a clear blue sky with scattered white clouds. The overall aesthetic is clean and minimalist.

# My Ozonex mini

## FOR PRIVATE POOLS

**T**he My Ozonex mini automatic controller is one of the latest innovations from our brand Ozonex. The device is connected by wifi or bluetooth, takes care of the filtration pump and is very easy to use. Your customers will appreciate its modernity, the comfort of connected management as well as the quality of the water for their living space. The unit is pre-mounted and easy to install on all existing pools, whether they are new or old, ideal for small pools or spas.

### Presentation

**M**y Ozonex mini is a connected automatic pH- and REDOX regulator that can be controlled remotely by smartphone or tablet. With a simple click, your customer can access the equipment of their choice and control it easily. He can also consult the product consumption report (per day / week / month) and obtain a visual on the level of products present in the tanks. Controlling the filtration is just as easy, offering the possibility of creating and managing different time slots according to your customer's wishes.

### Analysis chamber

**T**he measuring chambers are used for a better water circulation. Adaptable in monobloc version, these analysis chambers can receive from one to several probes, and measurement sensors: temperature, pH, REDOX.

### Dosing pump

**O**zonex peristaltic dosing pumps are used for dosing all types of liquid chemicals used for pH and chlorine management. The flow rate of the dosing pumps is 1.5 l/h.

### The package includes

- ✓ Pre-mounted 776x400 wall bracket.
- ✓ 1 My Ozonex mini automatic regulator.
- ✓ 1 probe holder + pH/REDOX probes.
- ✓ 1 acid dosing pump + 1 for chlorine.
- ✓ 1 pump connection kit + injection cannulas + crystal tube + reservoir bottom cannulas + 316L stainless steel injectors (for irrigation of the probe holder).
- ✓ 1 application kit for pool professionals.  
(remote management of your customer base)

## description and options

### Probes and sensors

- ✓ temperature of the water (PT 100)
- ✓ pH
- ✓ REDOX

### Automatic regulators

- ✓ pH-
- ✓ REDOX

### Automatic device management

- ✓ filter pump
- ✓ lighting
- ✓ heating (heat pump, heater)  
(installation of a temperature sensor + 1 electronic management card)
- ✓ automatic regulators  
(pH-, REDOX)

### Synoptic view

synoptic

The “synoptic” page becomes your pool assistant. In one click, it will graphically present the entire technical room of your customer without being present and wherever you are.

### The built-in parameters

- ✓ support for the filter pump
- ✓ programmable over-chlorination
- ✓ frost-free (avoids wintering)
- ✓ product consumption (day/week/month)
- ✓ product level in the bins (low level alarm)
- ✓ event log
- ✓ time slots for automation (4 slots maximum)
- ✓ calibration of the various sensors
- ✓ clock
- ✓ application for pool professionals
- ✓ OZONEX remote monitoring  
(additional security for the pool professional)

## FOR PRIVATE POOLS

The **SMART'OZO** automatic regulator is one of the latest innovations from our brand Ozonex. The device is connected by wifi or bluetooth, takes care of the filtration pump and is easy to use. Your customers will appreciate its connected management comfort as well as the quality of the water thanks to its integrated ozonator in order to guarantee a bacteriological certainty to your customers. The unit is pre-mounted and easy to install on all existing pools, whether new or old, ideal for small pools or spas.

### Presentation

The **SMART'OZO** connected automatic regulator is the ideal solution for your peace of mind. It manages the parameters of your pool for you, such as pH and REDOX, without being in default or in excess of the product, it analyses the pool water all day long in order to be in line with the predefined set points.

But it does not stop there, for the complete and natural disinfection, the integrated ozonator will give whole satisfaction to your customers, it will destroy in only one time the organic matters, the germs, the bacteria and the viruses present in water as well as a great part of chloramines.

### Analysis chamber

The measuring chambers are used for better water circulation. water circulation. Adaptable in monobloc version, these analysis chambers can receive from one to several probes and measurement sensors: temperature, pH, REDOX.

## description and possibilities

### The synoptic

The synoptic page is a graphic view of the entire pool installation. It groups together all the elements handled by your appliance (lighting, filtration pump, the different regulators installed and their respective canisters, etc.). To reach the element that you wish to control or modify, press on it to display the corresponding page.

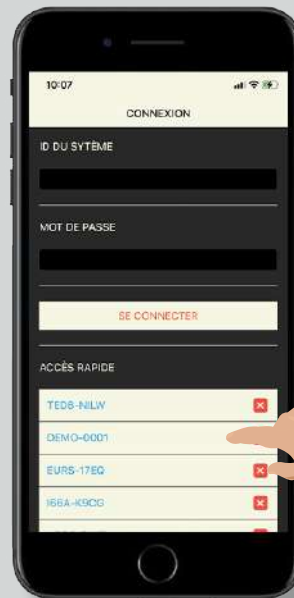

### Home

The home page contains all the important information about your customer's installation at any given time:

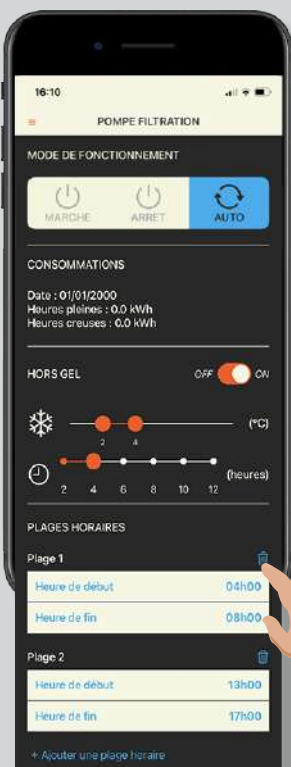

- pH value
- REDOX value
- DPD1 amperometric value
- water temperature
- filter pressure

The calibration of the different sensors are on this page.

### Customer login

To connect to one of your pools, nothing could be easier, you just have to identify them on your application (ID + individual password) in order to have a quick access to your customer base.

### Filter pump

The filter pump page allows you to set the filter pump to forced start, stop or automatic mode via time slots that you can modify as you wish, 4 possible time slots. The automatism for the frost protection can be found on this page.

### Events

The events page of your application retraces the actions of the last 30 days (start-ups and shut-downs of the filtration, heating, booster, etc.). In case of anomalies, you will be given a complete and precise list of actions to be taken to remedy them (empty tank, clogged pipe...). Each task is colour coded, fun and easily identifiable.

# Application smartphone

## description and possibilities

### pH- regulator

The pH- regulator page shows you all the parameters you have predefined, the set point, the start hysteresis for injection, the remaining volume in the tank, your alarms...

With your smartphone, you can change the operating mode (on, off, auto), inform the volume of the tank after filling, change the high/low alarms.

The control part (injection parameters) can only be modified on your computer so that your customer does not disorganise your settings by mistake.

### ORP regulator

The ORP (REDOX) regulator page is identical to the pH page in terms of the possibilities and control of the parameters.

The superchlorination mode is on this page.

Activate it and fill in the day of the injection you want, the frequency and the quantity to be injected.

### Lighting

The lighting page allows you to remotely control the lighting of the pool in question, at any given moment, by means of the "on" mode, in auto mode with several possible time slots (maximum 4).

### Heating

The heating page allows you to remotely manage the operating mode (off, forced or automatic).

You can manage the temperature of the pool that your customer wants without moving.

A significant saving of time and money.

Ozonex has 30 years of experience and over 20,000 customers

# THE OZONEX SERVICE

a single point of contact

---

Offer your customers and employees the Ozonex quality of service.

## ADVICE

we are  
at your service

The entire Ozonex team is at your service and will advise you on your project in order to make the best choice. We will provide you with solutions adapted to your customer's needs.

By offering My Ozonex to your customers, you can reassure them with a maintenance service that sets you apart.

## INSTALLATION

simplicity and  
adaptability

We have been designing and manufacturing our entire range for over 30 years.

Each of our devices is easily adaptable to all pools, new or old, and without changing existing installations. The design has been thought out to offer you all the advantages of a safe operation.

## DISINFECTION

natural and  
economic

Ozone uses only ambient air for its production and is bactericidal, virulicidal, fungicidal and germicidal. An unequalled bacteriological quality.

It does not alter the pH, acts regardless of the temperature of the water and has a great therapeutic power on swimmers.

Ozone is a world reference for drinking water.

## REGULATION

optimising your  
travel

The My Ozonex home automation system allows you to control, automate and program the various pieces of equipment (filter pump, lighting, heating, sensors, filter pressure, etc.) wherever you are.

This saves time and increases the profitability of your services and maintenance contracts.
