

Automatic pH and ORP regulator

My Ozonex mini

This new device allows the pool owner to manage most of his installation. The device is connected via wifi or bluetooth and can be controlled remotely via smartphone or tablet. The design has been designed so that you can put it yourself, the set is pre-assembled, very easy to connect.

Its use is simple and intuitive. Thanks to the exclusive use of a smartphone and the dedicated application, your My Ozonex mini will give you a view of the entire installation in the blink of an eye. Thus, it offers direct access to all possible information about your pool or spa and allows you to easily determine the type of function and the desired options for each of the applications.

Examples of the possibilities of My Ozonex mini :

- integrated automatic pH/REDOX regulator
- filtration pump management (4 possible time ranges)
- heating management (optional with temperature probe)
- probe calibration
- off gel programmable (avoid winter)
- overchlorination also programmable
- sensor management (temperature, pressure...)
- control and filling of product containers (acid and lye/chlorine)

You will also benefit from remote monitoring of your pool by a qualified Ozonex technician from 9am to 6pm which provides additional security for the consumer.

The set includes

automatic pH/ORP
regulator (My Ozonex mini)

door water inlet
probes (stainless steel
tip 316L)

probe holder
+ pH/ORP probes

wall bracket
(780x400)
